

INSULATED 45 DEGREE BEND

R718.00

INSULATED 45 DEGREE BEND,

Imported from Europe and made of 304 mirror finish stainless steel.

Use double wall 45° bend to divert an insulated flue pipe.

A typical example is when a flue pipe needs to go through a wall so you will need 2 sets of 45° bends
- one bend on either side of the wall.

Choose between our three basic diameters (inside diameter) - \varnothing 130mm , \varnothing 150mm and \varnothing 180mm.

Dimensions

- Inside diameters : \varnothing 130mm | \varnothing 150mm | \varnothing 180mm
- Outside diameter: \varnothing 180mm | \varnothing 200mm | \varnothing 230mm
- Material : 304 polished stainless steel
