

## SINGLE WALL FLUE PIPE | 130MM

**R474.00**

SINGLE WALL FLUE PIPE MADE OF HIGH GRADE STAINLESS STEEL - 130MM

### SINGLE WALL FLUE PIPE | 130MM

Imported from Europe and made of 304 mirror finish stainless steel.

Our single wall flue pipes come in standard length of 1000mm that can be stacked on top of each other.

Choose between our three basic diameters of flues -  $\varnothing$ 130mm ,  $\varnothing$ 150mm and  $\varnothing$ 180mm.

Single wall flues are generally used in conjunction with double wall insulated flue pipes and an adapter ("end-cap") which joins the two flues together.

Lava Fires offers a full range of bends and accessories to assist you with any type of installation.

We highly recommend to use our stainless steel flues with our Magma and Cubo closed combustion fireplaces and insert fireplaces in order to achieve maximum efficiency and performance.

## Dimensions

- Length : 1000 mm
- Diameters :  $\varnothing$ 130mm
